

Immunisation Policy

Background

Children who attend WEMOOSH are in close contact with a large number of other children for lengthy periods and are at increased risk of catching and transmitting illnesses and diseases. Some of these are preventable through immunisation. Educators are also at risk, particularly when pregnant.

Vaccination is recognised as the most effective way to prevent the spread of infectious diseases. In Australia, immunisation is optional. However, from 1 January 2016, parents must ensure their child's immunisations are up to date to be eligible for Child Care Benefit or Child Care Rebate. Exceptions are made for children with medical contraindications or natural immunity or certain diseases, and for those on a recognised catch-up schedule. Objections on the basis of personal, philosophical or religious beliefs (i.e. vaccination objections) are no longer accepted for exemption (i.e. do not provide eligibility for Child Care Benefit or Child Care Rebate).

Prior to enrolling children, WEMOOSH are now required to obtain approved documentation from parents about their children's immunisation status.

Policy statement

This Policy details the Service's practices regarding the enrolment and continued attendance of children based on their immunisation status. It also details the actions the Service will take in the event of an outbreak of a disease which can be prevented by immunisation. The Service supports the protection of children and educators through immunisation and provides families and staff with information about immunisation and vaccine preventable illnesses and diseases.

The spread of vaccine preventable diseases within the Service is minimised through monitoring immunisation records; complying with recommended exclusion guidelines and timeframes for children and staff; and routine personal and environmental health and hygiene practices.

Strategies and practices

- Parents are required to provide the approved documentation of their child's immunisation status before their child commences at the Service, and evidence of each vaccination thereafter. The approved documentation required is one of the following:

- o an official immunisation history statement issued by the Australian Childhood Immunisation Register (ACIR) which evidences that the child is up to date with their scheduled vaccinations
 - o a letter from a recognised immunisation provider (e.g. General Practitioner or immunisation nurse) which states the child is up to date with their scheduled vaccinations
 - o an ACIR Immunisation Medical Exemption Form (IM001) which has been signed by a General Practitioner.
- If a child's immunisation status is not up to date, the Service may:
 - o Accept enrolment and/or attendance of the child with conditions (e.g. attendance may be limited for a specific period of time due to an outbreak or confirmed case of a vaccine preventable disease)
 - Staff are encouraged to keep up to date with their immunisations. A list of available and recommended immunisations is provided to all staff.
 - The Service maintains a record of the immunisation status of each child. It also maintains a Non-Immunised Children – Register so that this information can be readily retrieved in the event of an outbreak of a vaccine preventable disease.
 - The Service routinely minimises the spread of illness and disease by promoting correct handwashing and other hygiene practices and maintaining clean and hygienic environments.
 - In the event of an outbreak of a vaccine preventable disease, the Service will notify the relevant health authority, and will follow its recommended guidelines and directives. Children who are not immunised may be excluded from the Service for the duration of the outbreak. In addition, staff who are not immunised may be excluded from work.
 - As soon as practicable after the outbreak of a vaccine preventable disease at the Service, staff will notify parents or authorised emergency contacts when they collect their children. Information sheets will be distributed to families on request. Parents of unimmunised children will be contacted directly and provided with written notice detailing the specific period their child will be excluded from the Service. Signs will be displayed prominently throughout the Service informing families of the outbreak.
 - If a child becomes unwell or is suspected of symptoms of an excludable infectious illness, the child's parents or authorised emergency contact are contacted immediately to collect their child. Wherever possible, the child is separated from the main group of children and one educator nominated to care for the child to reduce the risk of cross infection.
 - In the case of serious ill health or hospitalisation, the child or staff member is to provide a medical certificate from their doctor verifying that they are sufficiently recovered to return to the Service. However, the Nominated Supervisor has the final say on whether the child or a staff member may return to the Service.
 - The Service encourages staff to discuss with their doctor the topic of immunisation and the additional risks of contracting a vaccine preventable illness or disease inherent in their close, regular contact with the children. The Service also recommends that staff who may be considering pregnancy apply for screening for immunity for infections which carry risks of miscarriage or damage to the foetus (e.g. rubella, chicken pox, cytomegalovirus).
 - Educators are informed of the symptoms of excludable illnesses and disease and infection control through staff meetings and professional development and are provided with educational materials.
 - Risk assessments are conducted for unimmunised educators and pregnant staff to determine if any alteration to their work is necessary.

Responsibilities of parents

- To provide documentation of their child's immunisation status before the child commences at the Service, and update this as changes occur.
- To inform the Service if a communicable disease occurs in the family because the child may become a carrier.

Procedure and forms

- Non-Immunised Children – Register

Policy review

The Service encourages staff and parents to be actively involved in the annual review of each of its policies and procedures. In addition, the Service will accommodate any new legislative changes as they occur and any issues identified as part of the Service's commitment to quality improvement. The Service consults with relevant recognised authorities as part of the annual review to ensure the policy contents are consistent with current research and contemporary views on best practice.
